

Relational Landscape

Second International Landscape Triennale of Marne la Vallée

Call for Projects 2021

Marketplace
Vegetables and fruit from the shared garden, beer from the beer field, ... are sold on the unused plot in order to create short circuit network and prefigure the future marketplace

Workshops with the inhabitants of the Pyjama neighbourhood to find new usage for the court-yards as a shared space.
These workshops prefigure the project «Garage swap» where house owners can build dwellings or extensions instead of their garage by renting space in close-by microparkings

Tree nursery
Planting the motorway interchange to prefigure the landscape of the future neighbourhood.

Champs de Bière
Installation of a mobile micro-brewery on the parking lot.
Transforming the slope in a hop garden.
Brewing together with the habitants.
Tasting the beer with neighbours and brewers.

Proposition by the collective les-saprophytes.org:
Planting pleurotus to inoculate the park and inviting the visitors to the mushroom picking

Proposition by the collective Landscape Mama:
Shared garden project
Workshops with the inhabitants for planting, care and harvest
